Cloud Engineering

Secure cloud architecture and modernization.

- AWS, Azure, and Google Cloud
- Landing zones, migrations, hybrid integration
- Resilience, cost, and performance optimization

Cybersecurity & Compliance

Protection and control implementation across IT.

- IAM, least privilege, and Zero Trust
- Hardening, vulnerability, logging, and response
- NIST, RMF, FedRAMP, and CIS readiness

WHY JUEM GLOBAL

- Mission-focused veteran ownership
- One partner from service desk to cloud
- Security and compliance built into delivery
- Automation-first, documented operations
- Flexible prime, subcontract, and teaming support

DevSecOps & Automation

Secure and repeatable technology delivery.

- Terraform and infrastructure as code
- CI/CD, GitOps, containers, and Kubernetes
- Scripting, configuration, and release automation

IT Procurement & Lifecycle

Technology sourcing and lifecycle coordination.

- Hardware, software, and licensing support
- Vendor sourcing and acquisition coordination
- Asset deployment, inventory, refresh, disposal

REPRESENTATIVE TECHNICAL EXPERIENCE

- Secure multi-cloud infrastructure, migrations, and operational support across AWS, Azure, and Google Cloud.
- Identity, monitoring, endpoint support, technical controls, evidence collection, and compliance readiness.
- Production troubleshooting, upgrades, resilience, automation, documentation, and continuous improvement.
